The night was too bad for the city dada to gather Wednesday night—presumably—and the record echoes, "no quorum."

The new warden of the penitentiary will be selected next month. That is if, the dead-lock can be broken with a tin pistol.

What about the delegate to the silver convention at El Paso? Some should be appointed from Cerrillos and San Pedro.

Mr. T. J. McLaughlin, manager of the Copper Co. plant at San Pedro, has been in Albuquerque on business a part of this week.

There has been no severe winter weather so far as yet in this part of New Mexico. Light freezing of nights and pleasantly warm days.

The Apache Indians of Arizona still furnish their quota of depredations. Those Indians will never be good until they graduate—in other words until they are finished.

The famine in Russia covers an area equal to one half of the United States, and populated by four million people, hundreds of whom are dying daily from starvation and cold.

The days of base-ball are nearly numbered. Foot ball has about sent it to the rear. Foot ball is a better, squarer, manlier game any way, and its supremacy illustrates the survival of the fittest.

A tender foot in Albuquerque recently bit into a hot tomatoe, thinking it to be some kind of a prepared banana, but when he got one mouthful fairly munched up and found that it was alive, the expression of torture on his face would have drawn tears from a grindstone. He will eat his bananas raw hereafter.

It is the assumed prerogative of everybody to criticize a newspaper, says an exchange. If the newspaper should retaliate, what a rattling of dry bones there would be. Lots of men, whose lives are vulnerable, whose characters are the loudest-mouthed critics of the press. If their shortcoming, failings and frailties were shown up, they wouldn't appear in public for a month after.

Ft. Marcy is again to be occupied by government troops and Santa Fe will be full of blue-coated soldiery, among whose brilliant uniforms and shiny brass buttons the city police will be almost undistinguishable. This however will be the only mortifying result connected with the coming of the soldiers, and their sixteen dollars a month will prove a balm sufficient to heal even this wound.

The merchant who makes his advertising pay largest, is the one who makes no mistakes and sees that every detail of his business is properly conducted. The advertising always does its part, but bad management on the part of the merchant may cause him to fail, and others will say advertising didn't pay in his case. That is sheer nonsense. Judicious advertising always pays and pays big.

Why Dr. Price's Baking Powder is Superior to all others.

No great efforts are made by other manufacturers to procure and use pure materials.

It is true that one other company has the facilities, but its greed and cupidity induced it in an evil hour to use ammonia, in order to swell its profits. Hence the Price Baking Powder Company stands alone in its fight for a pure baking powder.

No other article of human food receives greater care in its production, or has attained higher perfection. Dr. Price's Cream is surely a perfect baking powder. Free from every taint of impurity. No other article used in the kitchen has so many steadfast friends among the housewives of America.

The court of private land claims has commenced business; it forbids attorneys and land grant claimants to file their cases and give the court something to do. For twenty years the people of this territory have clamored for a settlement of the Spanish and Mexican land claims here; the time is at hand for such settlement and prompt advantage should be taken of the chance.

It does not stand to reason, that congress will amend the accelerating the court of private land claims, until its defects are discovered in actual practice. Therefore cases ought to be filed and some authoritative rulings should be had; then if these prove that injustice would be done or that the law is faulty and can not be carried out without violating the letter and the spirit of the treaty obligations, regarding these land claims, relief from congress will be obtained much easier.

G. A. R. Election.
At the annual meeting of Carlton post, G. A. R., held last night the following officers were elected:

Francis Downs, post commander, Jacob Weltner, senior vice commander.

Francis Bowers, junior vice commander.

John Ayers, surgeon, Silas D. Lassier, quartermaster, William M. Berger, chaplain.

N. N. Newell, officer of the day, Jose Carter, officer of the guard.

With the exception of chaplain all of the above were unanimously reelected, having served in the same positions during the present year.

The following delegates to the department encampment to be held at Las Vegas were elected: Smith H. Simpson, E. H. Bergman, L. M. Meiley; alternates, James Garland, Louis Folsom, S. S. Beatty.

The post commander with the three delegates and H. M. Davis, Erastus W. Woods, Hiram Crampston, George W. Knebel and James L. Morris, past post commanders; W. S. Fletcher, medical director, and John T. Forsha, of the council of administration, will represent Santa Fe at the coming encampment. They will ask that the meeting for 1892 shall be held in this city.—New Mexican.

NEEDED LEGISLATION.

Baking Powder Bill Passed by the Minnesota Senate.

The recent newspaper discussion of the dangerous qualities of ammonia comes from the alarming increase of its use in baking powders. People who absorb it in small quantities from day to day suffer from slow ammonium poisoning. Taken internally in sufficient quantities it eats away the coatings of the stomach and intestines and causes death. Slow ammonium poisoning produces various forms of stomach trouble.

Not one woman in ten thousand would use an ammonia baking powder if she knew it. Such powders not only undermine the health, but Ammonium imparts a sallow and blotched complexion.

Following is the bill recently passed by the Minnesota senate. It's the danger signal which the law throws out for the protection of the people:

BILL FOR AN ACT TO REGULATE THE TRAFFIC IN BAKING POWDER.

Section 1.—Any person who shall knowingly sell or procure the sale, or offer for sale of any package or can of Baking Powder, containing any Ammonia in it, not distinctly, legibly and durably branded, stamped or marked in a conspicuous place with the words in the English language "This Baking powder contains Ammonia" in letters of great size, or any letters equivalent thereto in length, shall be guilty of a misdemeanor, and punished by a fine not less than \$20 nor more than \$50; shall be confined in the County Jail not less than ten nor more than twenty days or by both fine and imprisonment, at the discretion of the court.

Section 2.—The sale or offer for sale of the substance mentioned in the foregoing section in packages not stamped, marked, branded or labelled as therein required, shall be prima facie evidence of knowledge of the character of said substance, on the part of the person so selling or offering for sale and his employer.

Section 3.—This Act shall be in force on and after its passage.

NOTE.—An incident occurred in the house when the senate bill came up for passage, in reference to an amendment proposed by Mr. Diment. This was opposed by several members. Mr. Feig said that if the bill as it came from the senate was all right then the amendment was all wrong. The amendment compelling the printing of the word "Ammonia" on the label only affected the Royal Baking Powder, and no wonder they felt the senate bill was a blow to them.

THE DEPRESSION THAT EXISTS throughout the Southwest is due to the unnatural depreciation of silver and to the evil effects caused by that portion of the alien act that prohibits the investment of foreign capital in mining property in the territories. The object of the Southwest Silver Convention that is to convene on the 15th day of December, 1891, in El Paso Texas, is to discuss and take steps to remedy these evils. No other subject but the silver question and the modification of the alien act will be entertained by the convention, and all attempts to pervert the object of this mass meeting of miners by the introduction of questions foreign to the principles for which it was called, will be suppressed. The restoration of silver to its normal value or parity with gold, 129 29, and the obliteration of an unjust discrimination against the miners operating in the Territories, will engage the entire energy and time of the assembled miners of the Southwest.

THE COLORADO IRON WORKS.

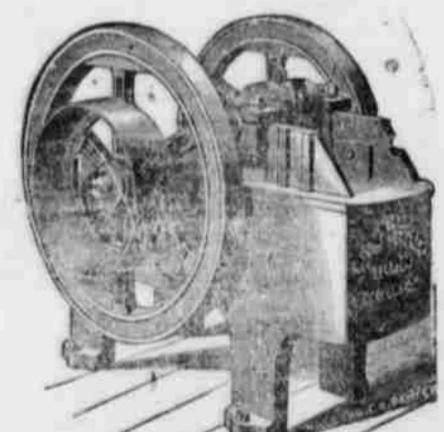

Works Office Thirty-third and Wyo:koop Sts., Denver, Colo.

Our manufactory being situated at the base of the Rocky Mountains contiguous to the greatest mining camps in the world, we are so situated, we can and do see the plants we build in practical operation almost daily, therefore our machinery has been perfected in all the little details up to date, which make our machines a success and others failures. We come daily in contact (not with the stockholders who live in the east, but) with the users of mining machinery, enabling us to adopt improvements far in advance of other manufacturers situated farther east.
